

Recyclopedia

A product pitch by Saurab Tiwari

The Problem

What problem does your product website solve or address?

- Make it real with a story, example, or trend
- Use numbers or research if possible
- Why should people care?

Textbooks are expensive, think about a time where you or someone else you know purchased a book for a class. Maybe you used it for a semester or two, but after that its left in your room somewhere collecting dust. That same book could be used by another student!

Your Solution

What is your product idea, and how does your website help solve the problem?

- Describe how your solution addresses the problem you identified.
- Keep it focused and clear
- Explain what makes your solution different

Introducing Recyclopedica, a website designed to help recycle old textbooks that are no longer needed! Recyclopedica focuses on creating a more affordable environment for college students. Textbooks could be listed for free or for a lower price than MSRP!

Website Type

What type of website are you building?

- Examples: Blog, Business, Brochure, Crowdfunding, E-Commerce, Educational, Media/Entertainment, Nonprofit, Personal, Portal, Portfolio
- Why is this the best format to support your product?

A marketplace/business website. This is the best format for my website because it is essentially a marketplace for students/.

Software Development Process

What software development process will you use?

- Waterfall, Agile, or Scrum?
- Why is this the best fit for your project goals and timeline?

The software development process that will be utilized for Recyclopedia is Agile. Agile was selected because of its dynamic nature, allowing adjustments and changes to be made without strict expectations. This development process is the best for Recyclopedia because it revolves around students, so it needs feedback and change in order to better fit the audience.

Target Audience

Who is the site for?

- Include 2–3 fictional visitor personas
- For each visitor, include:
 - Name
 - Gender
 - Age
 - Location
 - Occupation
 - Income
 - Web Use
 - Reasons for coming to your site
- Complete this step manually using a table or with AI tools ([ChatGPT](#))

Persona 1: Student Buyer
Name: Maya Rodriguez

Gender: Female

Age: 19

Location: Providence, Rhode Island

Occupation: College Student

Income: \$500/year

Web Use: Uses the internet daily for schoolwork, shopping, social media, and finding affordable products.

Reasons for coming to Recyclopeda: Maya needs textbooks for her college classes but finds new textbooks too expensive. She visits Recyclopeda to search for free or low-cost used textbooks from other students.

Persona 2: Student Seller
Name: Ryan Brooks

Gender: Male

Age: 21

Location: Boston, Massachusetts

Occupation: College Student

Income: \$15,000/year

Web Use: Frequently uses websites and apps to sell used items, research school materials, and manage his college life.

Reasons for coming to Recyclopeda: Ryan has several textbooks from previous semesters taking up space in his room. He wants to sell or donate them through Recyclopeda rather than throw them away, potentially earning some money back while helping another student.

Key Content & Features

What will visitors find and do on the site?

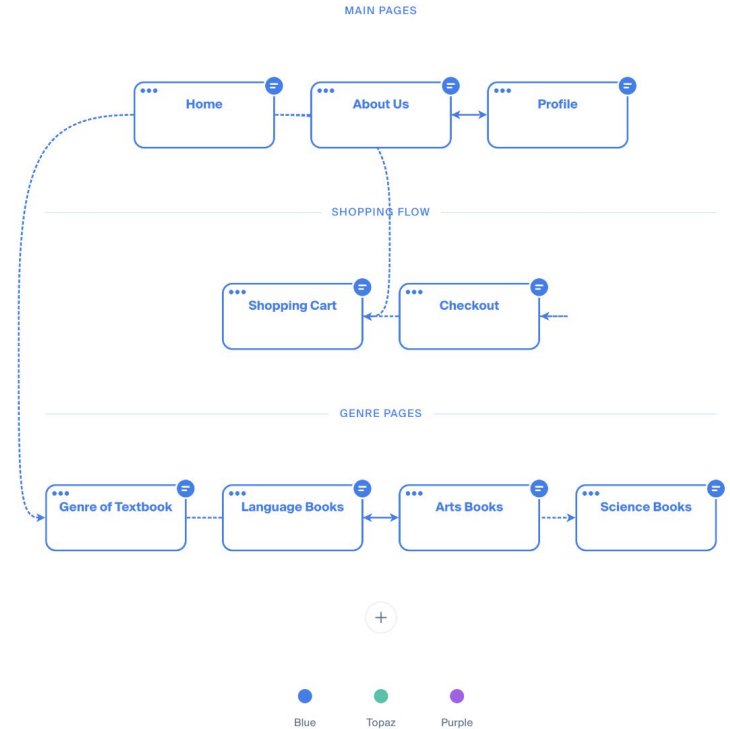

- What pages are essential?
- What main features should the site offer?
- What key content and features will help users achieve their goals?

Visitors can browse the site for textbooks that are posted by users or post some textbooks themselves. The essential pages of the site are a browsing page, an extra details page, a textbook posting page, a profile page, and a direct messaging page. The key content and features the site will offer to help users achieve their goals are as follows: direct messaging, posting textbooks, and browsing textbooks.

Site Map

Insert or sketch your site map.

- Start with the homepage
- Show page groupings and navigation paths
- Complete this step manually on paper, using draw.io or with AI tools ([Slickplan](https://Slickplan.com), Octopus.do)

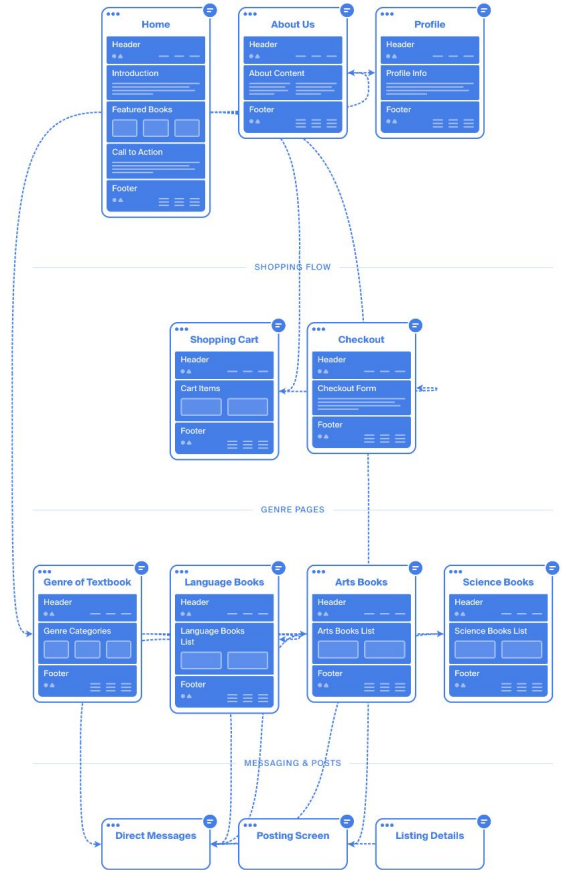

Wireframe

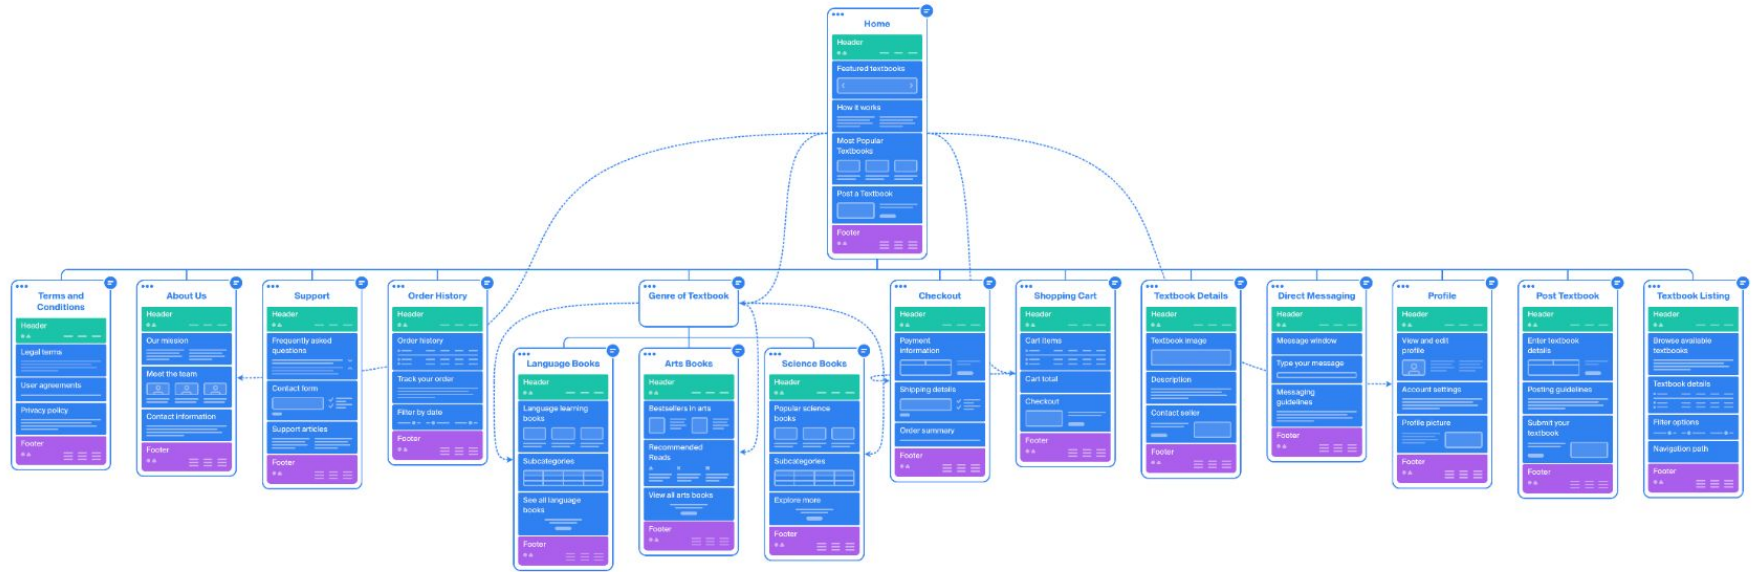

Insert a wireframe of your homepage.

- Show layout of header, navigation, content blocks, footer
- Focus on what goes where, not design details
- Complete this step manually on paper, using draw.io or with AI tools ([Uizard](https://uizard.io), [Figma with AI plugins](https://figma.com))

Pitch Summary

Wrap up your pitch.

- Why is your product needed?
- What are the key benefits of your solution?
- Why is now the right time for it?

Recyclopedia is needed because it makes pursuing higher education less of a financial burden. Our main benefits are cheaper textbooks for students and earning some cash back on textbooks you've purchased. It's the right time for Recyclopedia because every day thousands of textbooks are left unused.

Feedback Questions

Include any specific areas where you'd like peer or instructor feedback.

- Is the solution clear?
- Are the features too much/little?
- Is the target audience well-defined?

What are your thoughts on monetization and the overall purchasing system? Should students pay in person on Campus and the app be monetized through ads and other purchases? Or should students be able to purchase the textbooks through the website?
